Re: Property in Penn Township , Huntingdon County (Beside Old Ralph's Ribs)

To Whom it may concern:

On May 28, 2010 on the lot located beside old Ralph' Ribs on 7 Points road, I observed a 23" water table in the test pit dug by James Graham. The slope is over 15% which is the max a SEO can permit for a sandmound septic system.

There is a chance a drip irrigation system could be used because they can be installed up to 25% slope, but this would require a soil scientist to be involved. If the lot was used for commercial purpose a holding tank can be used.

If you have any additional questions you can contact me.

Sincerely,

  
Barry Parks
